

Evidence-Based Horsemanship Seminar

With Martin Black and Dr. Stephen Peters, the authors of *Evidence-Based Horsemanship*

Nov. 18-20, 2016
Durango, Colorado

Using an interactive learning approach, this seminar is a must for equestrians, regardless of discipline and breed preference! The authors combine science and empirical observation to educate participants through multimedia presentations, discussions, demonstrations, observations of horses, and a horse brain dissection.

By attending this seminar you will:

- Understand how your horse's brain functions
- Increase your understanding of your horse's behavior
- Learn to recognize subtleties of reactions and chemical states
- Shape your training to maximize your horse's potential
